# 7-23-Café Food Service Order System User Guide

This user guide develops with program procedure. Text to screen matches one by one.

(1) Welcome: In the welcome screen display a 7-23 logo. 2 commands are available:

   (a) Start: start a new order.

   (b) Exit:exit the whole system, only do this if finished business.

(2) Getting OIS: ois code must be unique. There is a vacancy check in the system. If occupied, the system would ask for another input.

```
   C3        Hot Chocolate                          $28
   C4        Milk                                   $26
   C5        Juice                                  $26

Section S: Set Meals

```

(5) Order review and confirmation: show order items, total cost and ois code. After

confirmation, the system will be back to (1) Welcome.

Notes:

a. The system will automatically clear the screen between each procedure to make

display clear and easy to identify its use.

b. There is no way to get the back-end data from this program, which requires

another back-end program in the system.

c. Between every payment confirmation to the next welcome screen there is a

4-second sleep.
